Professional Summary

Senior Data Engineer | Snowflake Specialist | Cloud Data Engineer | AI-Enabled Systems

Results-oriented **Senior Data Engineer** with 13+ years of experience designing, developing, and optimizing scalable **cloud-native data platforms**, with deep expertise in **Snowflake, dbt, Airflow**, and **data modelling**. Proven ability to lead end-to-end data warehouse solutions, performance optimization, and large-scale system migrations.

Currently leading **AI adoption initiatives** across ETL/ELT pipelines and experimenting with **Agentic AI** for proactive monitoring, self-healing data workflows, and intelligent metadata enrichment. Skilled in cross-functional collaboration, stakeholder alignment, and delivering high-performance systems in agile environments. Excels in enabling real-time analytics and secure, automated data ecosystems across cloud infrastructures.

Professional Experience

Cognizant Technologies — *Senior Data Engineer*

Client: DocuSign | **Location:** Chennai, India | **Feb 2022 – Present**

- Designed and automated **Snowflake-based data pipelines** using **Airflow and dbt**, reducing manual refresh cycles by 80%.
- Led the **ODS to Snowflake migration**, modularizing legacy PL/SQL ETL into scalable ELT, decreasing query latency by 60%.
- Collaborated with UI & product teams to deliver optimized **certified data layers** for Tableau dashboards powering executive reports.
- Enforced column-level masking, and compliance guardrails in Snowflake to protect sensitive customer data.
- Integrated **AI-enhanced anomaly detection** into monitoring workflows, improving issue resolution time and data reliability.
- Initiated **Agentic AI prototypes** to simulate recovery scenarios and enable intelligent routing for job failures.
- Documented and unit-tested all transformation logic using **dbt + JIRA workflows**, resulting in a 40% reduction in production bugs.

BNY Mellon Technologies — *Technical Lead Analyst*

Project: NETX360 | **Location:** Chennai, India | **Apr 2014 – Jan 2022**

- Led a team responsible for delivering **critical investment platform capabilities**, ingesting billions of records monthly across Banking & Brokerage.
- Developed complex PL/SQL procedures, views, and packages to support backend services and **dynamic VM-deployed Spring Boot APIs**.
- Migrated document ETL workflows from **Linux to cloud**, maintaining **zero SLA breaches** during large-scale transitions.
- Implemented **CI/CD pipelines** and monitored system health using **AppDynamics, Solunk**, and **REST APIs**.
- Drove **performance optimization** efforts, tuning queries and reducing monthly ETL window by over 50%.
- Recognized in town hall for UX enhancements and delivery of enterprise E-Delivery screens with Angular & Java integration.

Techcmantix Pvt Ltd (Client: Bank of Montreal) — *Oracle PL/SQL Developer*

Location: Chennai, India | **Aug 2011 – Mar 2014**

- Developed and optimized SQL/PLSQL logic for Canada-based retail and commercial banking services.
- Managed end-to-end ETL development and performance tuning for reporting workflows.
- Led root cause analysis and change control coordination with QA and deployment teams.
- Maintained data accuracy, wrote test plans, and ensured system stability through smoke testing and defect resolution.

Technical Skills

Data Platforms: Snowflake, Oracle 10g/11g, DB2, SQL Server, IBM CMOD

Cloud & Tools: AWS (basic exposure), Azure (basic exposure), Airflow, dbt, Tableau

Languages: SQL, PL/SQL, Unix Shell Scripting, Java, Python (for scripting & automation)

ETL & Monitoring tools: DBT, Airflow, SnowSQL, Splunk, AppDynamics, Fivetran

AI/Agentic AI: Anomaly detection, Intelligent job routing (PoC level), Crew AI, Cursor, LANGGRAPH

CI/CD & DevOps: JIRA, Git, AppDynamics

Other: JIRA, SNOW, Visual Studio, SharePoint, Postman, SOAP/REST APIs

Education

Bachelor of Engineering (Electrical & Electronics)

Paavai Engineering College, Namakkal, Tamil Nadu – 2010

HSC – Mahendra Matric Hr. Sec. School, Namakkal – 2006

Projects of Interest

- **Snowflake and DBT with Airflow orchestration** – Data migration projects with **Cursor AI** tool for optimising the query and creating DBT models with reference of legacy Snowflake ETL's.
- **Agentic AI PoC**: Experimented with lightweight AI agents to monitor Airflow DAG failures and simulate recovery flows.
- **AI-Augmented Data Validation**: Integrated anomaly detection using Python scripts into dbt transformations to auto-flag data quality issues.
